## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 are drawn to a method of reducing diabetes in a patient who is at risk for developing diabetes by administering an angiotensin converting enzyme inhibitor, classified in class 514, subclasses 423 and 866.
- II. Claims 12 and 13 are drawn to a method of slowing or reversing the decline of  $\beta$ -cell function in an individual with an angiotensin converting enzyme inhibitor, classified in class 514, subclass 423.
- III. Claims 14 and 15 are drawn to a method of increasing islet blood flow in an individual by administering an angiotensin converting enzyme inhibitor, classified in class 514, subclass 423.
- IV. Claims 16 and 17 are drawn to a method of increasing pancreatic  $\beta$ -cell perfusion in an individual with an angiotensin converting enzyme inhibitor, classified in class 514, subclass 423.
- V. Claims 18 and 19 are drawn to a method of lowering aldosterone secretion and renal potassium wasting in an individual with an angiotensin converting enzyme inhibitor, classified in class 514, subclass 423.

The five inventions are independent and distinct, each from the other as they have a separate status in the art as shown by their different and separate subject matter

for inventive effort. Further, a reference, which anticipates any one of the above inventions, would neither anticipate nor make obvious of the other inventions. Each such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traversed.
